CADAVERIC COURSE 2005

Dear Friends,

We welcome you to the 1st Cadaveric Course in Arthroscopic Surgery of the Knee and Shoulder. For the First time in Delhi, wet models are being arranged for this hands on Arthroscopy Course. The venue of the workshop is in the Department of Anatomy, Maulana Azad Medical College, New Delhi.

The format of this workshop will be hands on arthroscopy experience on Cadavers which will provide a real time experience of arthroscopy. The delegates will have the opportunity to handle arthroscopy equipment, perform arthroscopy procedures and learn technical skills from the learned faculty.

Another interesting feature of the workshop will be group discussion sessions where important technical aspects of arthroscopic procedures will be explained by the faculty to small groups of delegates. The aim of this course will be teaching of very basics of knee & shoulder arthroscopy.

The whole format of the workshop is informal and extensive interaction between faculty and delegates will be encouraged. Registering delegates can opt for either knee or shoulder arthroscopy course and indicate their preference. They must also indicate their willingness to register for their second choice in case of non availability of seat.

We welcome you to this Cadaveric course and are sure that each delegate will learn a lot from this workshop.

See you in Delhi on 29th May 2005

Dr Pushpinder Bajaj

Dr IPS Oberoi

Dr Lalit Maini

Next Advanced Cadaveric Course, March 2006
