TESTIMONIAL

This ISKSAA Travelling Fellowship under Dr Nicholas Wallwork Sir at Sportsmed in Adelaide, Australia covers all major aspects of Upper Limb Surgery including Hand and Wrist.

You will get to see and learn management of most upper limb pathologies including Trauma, Instability, Arthritis, AVN, Elective Hand Surgery, etc.

Sir is one of the pioneers of Upper Limb Surgery in Australia which is known to all but Sir will also guide you on how to manage your patients and also give his take on principles of specialised surgery in Shoulder and Elbow and Hand Surgery.

Sir was very hospitable and kind. He was very respectful and made sure that his fellows were comfortable at all times. He also took us around town with him and we also did some recreational activities.

Sir is very disciplined and meticulous about his work and is very slick at his job. He is a Bike Enthusiast and also runs marathons on weekends.

Sir will take you with him during the two weeks wherever he goes which involves 2-3 hospitals in Adelaide, Australia.

You will attend clinics, theatre sessions and will see patients in both the public as well as private sector and will have good understanding of all topics in depth.

Sir had lined up the cases for us and also went out of his way to have the surgeries we wanted to see arranged for us in his absence.

We had a great time with Sir in Adelaide, Australia and would certainly recommend this Fellowship under his guidance to learn from him.

Regards.
Dr Nishit Jayant Shah
