

Testimonial – Dr. Hemant Kumar
Fellow in Arthroplasty and Trauma
Orpington Hospital/PRUH, UK
Mentor: Dr. Sandeep Kohli

"My fellowship at Orpington Hospital, UK, under the esteemed guidance of Dr. Sandeep Kohli, has been an incredibly rewarding experience. The program offered extensive exposure to a broad spectrum of Arthroplasty, Arthroscopy and trauma cases, ranging from primary and complex Joint replacements to severe Trauma and Sports injury cases.

Dr. Kohli's meticulous approach to patient care and surgical planning taught me the value of precision and evidence-based practice. I was actively involved and observed the every stage of patient management— surgical training significantly enhanced my confidence and decision-making skills.

The academic environment was equally enriching, with regular case discussions. The collaborative and supportive atmosphere in the orthopaedics team made my transition into the UK healthcare system smooth and productive.

I feel privileged to have trained under Dr. Kohli and to be part of Orpington Hospital's outstanding orthopaedic department. I would highly recommend this fellowship to anyone looking to gain high-quality training in arthroplasty, arthroscopy and trauma surgery." I also wants to thanks to Dr Verma, Dr Tavan, Dr Gulihar, Dr Edwards for teaching, helping in learning and seeing various surgeries. Sp thanks to Dr xaid Mehron and Sister Sofiya for there kind hearted nature. Furthermore, from all fellows we wants to thanks to Dr Pushpender sir and his team for providing the stage for doing and observing fellowship in various countries.
